

Health Professional Scholarship

Eligibility and Award Stipulations

Please read this document in conjunction with the How to Apply document carefully before completing an application form.

The Heart Foundation: supporting life-saving research

The Heart Foundation is an independent, Australia-wide, not-for-profit health organisation, funded almost entirely by donations from the Australian public.

Our purpose is to reduce premature death and suffering from heart, stroke and blood vessel disease in Australia.

The Heart Foundation offers awards to fund research which is conducted primarily in Australia and is engaged in research related to cardiovascular health.

How to apply

All applications must be submitted through the Heart Foundation's Researcher Portal. This link will be accessible through the Heart Foundation website, along with further award details

<https://portal.heartfoundation.org.au/>

Please note, you should direct all eligibility and application content enquiries to the research office of your institution.

General information

The Heart Foundation may vary the conditions under which the award is made by granting prospective or retrospective awards.

Administering Institution

The research supported by the Heart Foundation award must be administered by an [NHMRC Administering Institution](#).

The Administering Institution (or its affiliate) shall provide the facilities and services necessary for the efficient conduct of research during the term of the award.

The Heart Foundation requires that all Administering Institutions will have appropriate policies and procedures in place to deal with any allegations of research misconduct that may arise.

An application must be endorsed by the Administering Institution's Research Office, before it is regarded by the Heart Foundation as submitted. The Heart Foundation funding process only recognises NHMRC Administering Institutions.

It is the responsibility of the applicant and the Research Administration Officer (RAO) to ensure that the application is complete and accurate.

Applications must be endorsed by the Research Office of the Administering Institution and submitted online by 5.00pm (AEST) on the due date. Applications that are late, or do not adhere to the instructions will not be considered further.

Funding from the tobacco industry

The individuals, research groups or research institutions associated with a Heart Foundation grant or award shall not accept any money by way of research grants, consultancies or sponsorships from the tobacco industry or persons connected with the tobacco industry. This includes direct funding, as well as advertising, sponsorship, gifts or loan of goods or services, or funding by any other means.

Eligibility Criteria and Conditions

The Health Professional Scholarship encourages and supports cardiovascular health professionals to undertake a PhD.

Eligibility is as follows:

- Must have any health professional background and is engaged in cardiovascular health practice
- Must be yet to commence their PhD (or an equivalent degree) or must have completed less than 12 months of work (at the full time equivalent (FTE) of 1.0) toward their PhD at the time of application. If you are yet to start your PhD, the commencement date must be within six months of 1 January of the year after the application closing date.
- Must be an Australian or New Zealand citizen, or an Australian permanent resident or have applied for Australian permanent residency at the time of application.
- Scholars may not hold another scholarship at the same time as a Heart Foundation Health Professional Scholarship. Applicants who hold another scholarship at the time they apply for a Health Professional Scholarship must relinquish the other scholarship before the commencement of this scholarship.
- Must adhere to character limits where it is specified in the application.

The PhD may be in any area of cardiovascular research, including biomedical, clinical, public health and health services research.

Health professionals who also have a strong research background are uniquely placed to champion and lead the translation of research into practice, conduct translational research and implement evidence-based practice.

Applicants will be encouraged to continue their cardiovascular health practice during their PhD. The applicant's plan for the continuation of their cardiovascular health practice during their PhD is an assessment criterion for this award.

Relative to applicant's background

When assessing applicant's track records, the committee will be instructed to assess work history/experience as equivalent to academic achievement.

Length of scholarship

The total length of the award will be no more than the equivalent of three years at 1.0 FTE, less any time already completed towards the PhD at the time the scholarship commences.

Scholarships may be full time or part time at a minimum of 0.5 FTE. Requests for FTEs less than 0.5 FTE will not be considered by the Heart Foundation.

Partner/Co-funding

The Heart Foundation may seek funding opportunities with other nationally competitive institutions and funding bodies to fund as many top-quality researchers as possible. Applicants who have successfully applied for similar awards to other agencies within the same year may be offered the opportunity to receive a co-funded award.

Timing

Successful applicants may choose to commence their Fellowship on either 1 January, 1 April, or 1 July. Special permission to commence on a different date must be approved by the Heart Foundation, prior to signing of a funding agreement.

Application assessment

Only eligible and complete applications will proceed to peer review. The Review is conducted by an independent Peer Review Committee made up of eminent cardiovascular researchers with broad research experience in areas including biomedical, clinical, public health and health services research.

Applicants will be notified of the outcome of their application in October and successful applicants will be provided with administrative details for their funding.

Applicants are assessed based on:

- relevance to cardiovascular health
- relevance to the stated purpose of the award
- track record/work history of the applicant
- quality and feasibility of the research proposal

The Committee will then make funding recommendations to the Heart Foundation. Funding recommendations are endorsed and approved by the Heart Foundation's Research Committee and Research Strategy Committee.

All unsuccessful applicants will receive quantitative feedback on their ranking.

Successful Applicants

Payment of Award

Health Professional Scholarships provide stipend only. Stipend funding levels for scholars are:

Stipend – Year 1	\$40,000
Stipend – Year 2	\$40,700
Stipend – Year 3	\$41,400

Payments will be made quarterly and in advance. Administering institutions will be required to submit a tax invoice (in accordance with the GST Act) to the Heart Foundation at the start of each quarter.

The Heart Foundation operates on a calendar year basis and funds not invoiced for within the calendar year will not be available after 31 December of that year.

Stipends offered are exclusive of Superannuation Guarantee Contribution, workers compensation, leave loading and payroll tax.

Funding agreements

All applicants and administering institutions will be required to sign the Heart Foundation funding agreement. Failure to do so will preclude eligibility for the award.

The funding agreement includes reporting requirements and stipulations of the award (including changes). It is important that administering institutions and awardees are familiar with the funding agreement.

The funding agreement will be prepared by the Heart Foundation and its content is not open to negotiation.

Awardee Obligations

As required, awardees are expected to:

- Submit progress reports and financial acquittals in accordance with awardees funding agreement
- Notify the Heart Foundation of any amendments /changes to the project or awardee employment.
- Make the results of their research available through the usual scientific channels
- Contact the Research Program in advance of publications going to press or conference presentations occurring (where possible)
- Acknowledge the Heart Foundation in publications and presentations
- Send published papers to the Research Program
- Participate in peer review of applications
- Participate in Heart Foundation promotional initiatives

Conduct of research and clearance requirements

Safeguarding the rights and welfare of human subjects involved in research and maintaining high standards for the humane treatment and welfare of animals used during the tenure of a Heart Foundation award is the responsibility of the awardee and of the institution in which the award is tenable.

Research funded by the Heart Foundation shall be conducted in accordance with the *Australian Code for the Responsible Conduct of Research (2007)*.

Ethics clearances required for the award, as outlined in the funding application, must be obtained and maintained for the duration of the Project and copies of these clearances shall be provided to the Heart Foundation within 30 days of approval, or as requested.

Individuals, investigators or research institutions associated with Heart Foundation awards shall abide by the current NHMRC Guidelines issued pursuant to Section 95 of the Privacy Act 1988.

Confidentiality and Commercial-in-Confidence

All applications will be treated confidentially and will only be viewed by assessors, the review committees, and Heart Foundation Research Program staff.

The Heart Foundation acknowledges that some applications may have commercial outcomes and that in some instances commercially sensitive information may not be included in a funding application to protect the Intellectual Property (IP) of the project. However, applications must include sufficient information pertaining to the scientific rationale and principles underpinning the research for it to be vigorously peer-reviewed and assessed. As all applications are kept Commercial-In-Confidence, and the Heart Foundation adheres to the Australian Code for the Responsible Conduct of Research, which protects any IP in the application, the provision of sufficient detail for peer review will not jeopardise their commercialisation potential.
