Love your heart

Quick guide to support heart recovery

In hospital
Leaving hospital
Recovery plan
What has happened to my heart?

Understanding your heart condition and treatment can help your recovery and make you feel less anxious.

Ask your doctor or nurse to explain your heart problem and to give you information you can take home.

Why has this happened?

Your doctor or nurse will be able to explain some of the reasons for your heart condition. These reasons are called risk factors.

The more risk factors you have, the more likely you are to have a heart problem.

Risk factors include:

- Smoking
- High blood pressure
- Diabetes
- High cholesterol
- Unhealthy eating
- Being overweight or obese
- Not being very active

Making changes to these risk factors, such as lowering your blood pressure can improve your heart health.
Leaving hospital

Getting ready to leave hospital
Recovery starts in hospital and continues after you leave.
Use this checklist to discuss with your nurse or doctor.

My recovery checklist
○ I understand what has happened to my heart and the follow up care I need
○ I know what risk factors I have and what I need to do to manage them
○ I have a referral to a cardiac rehabilitation program
○ I understand my medicines and how to take them
○ I know what to do if I get chest pain or other heart attack warning signs
○ I will/have arranged a follow up appointment with my local doctor
○ I know about home care and other support services

Cardiac rehabilitation – help for your heart
Cardiac rehabilitation is an important part of your recovery.

A cardiac rehabilitation program will help you:
✔ cope with what has happened
✔ learn more about your heart condition
✔ manage your risk factors
✔ understand your medicines and how to take them
✔ get back to every day activities and eat healthily
✔ understand the warning signs of heart attack

Ask your doctor or nurse about a referral to a cardiac rehabilitation program.

You can also call the Heart Foundation Helpline on 13 11 12. If you need an interpreter, call 131 450.
Recovery plan
