Some medicines should NOT be taken with an ACE inhibitor

- ibuprofen (like Nurofen®) and some other medicines.

Always tell your Aboriginal Health Worker, nurse, doctor and pharmacist about all the medicines you are taking, even if you buy the medicine yourself at the supermarket or store.
Side-effects of ACE inhibitors

ACE inhibitors can have unwanted effects, called side-effects. Side-effects do not happen to everyone and often go away after a short time.

**Mild and common side-effects:**

- dizziness
- cough

**Serious side-effects**

A **serious** and **uncommon** side-effect of ACE inhibitors can be:

- swelling in the face and throat and difficulty breathing

If this happens you need to call 000 for an ambulance or see a doctor straight away.

Talk to your Aboriginal Health Worker, nurse, doctor or pharmacist about side-effects.
