Some medicines should NOT be taken with a thiazide diuretic

Always tell your Aboriginal Health Worker, nurse, doctor and pharmacist about all the medicines you are taking, even if you buy the medicine at the supermarket or store.
Side-effects of thiazide diuretics

Thiazide diuretics can have unwanted effects, called side-effects. Side-effects do not happen to everyone and often go away after a short time.

**Mild and common side-effects:**

- You will pass urine more often a few hours after taking a thiazide diuretic.
- Take this medicine in the morning, soon after waking up.

Talk to your Aboriginal Health Worker, nurse, doctor or pharmacist about side-effects.
