

**Help stop Australians
losing loved ones to
heart disease**

Hi, my name is
and I'm a neighbour of yours.

Did you know heart disease is Australia's biggest killer of both women and men? Many die tragically young, often without warning, leaving families behind.

That's why I've volunteered to be one of Heart Foundation's doorknockers to raise funds for world-class research that will save lives.

I'll be knocking on your door on

Please give generously to help stop so many Australians losing loved ones.

If, for some reason, I miss you, please show you have a big heart by making a donation at **bigheartappeal.org.au** or by calling **1800 55 22 55**.

Thank you
